

Complex-network topology features for the gamma-GBM (design, matching scripts/eda/complex_network_gbm.py)

PART A - market-level topology (paper method, causal / trailing)

PART B - per-stock daily gamma-GBM (our task)

GBM: $x \in \mathbb{R}^9$ (OWN) GBM+topo: $x \in \mathbb{R}^{16}$ (OWN $\oplus$ 7 topology) markets: HOSE · S&P 500
